Penpower Jr. User Manual

Version: V7.2
Release: June, 2010
Edition: 1

Penpower Technology Ltd.,
Software User License Agreement

You are licensed to legally use this software program ("the Software") by Penpower Technology Ltd ("Penpower") under this license agreement ("The Agreement"). If you do not agree with any of the provisions in this Agreement, please do not install, copy or use the Software. By using the Software, you are deemed to fully understand and accept the provisions of this Agreement.

1. Intellectual Property

All intellectual property rights in the Software, together with all information and documents included in the packaging for the Software (including but not limited to copyrights), are property of Penpower, and are protected by relevant laws and regulations.

2. License to Use

You are authorized to use the Software on one (1) single computer only. You may not use the Software on any other machines other than the said single computer.

3. Authority to Copy

The Software and all documents included with the Software, and copyright thereof, are property of Penpower. You are licensed to make one (1) copy of the Software for your personal backup purposes. All other acts of copying are strictly prohibited.

You may not sell, lease, dissemble, reverse engineer, copy, translate, adapt or derive the Software, or obtain the source code of the Software by any other means. You may not use the Software for any purposes other than those permitted under this Agreement.

4. Business Users

If you need to install or use the Software on more than one (1) computer, please contact Penpower or our local distributor to purchase a license for the additional use.

5. Liability

You agree to indemnify Penpower against all losses, costs, debts, settlement payments or other expenses (including but not limited to attorneys fees) arising from your breach of this Agreement, and you agree to compensate Penpower for all of the abovementioned damages.

6. No Warranty

Effectiveness of a packaged software in handling information is closely related to its software and hardware environment. The Software is published following careful development and product testing by Penpower, but Penpower is not able to conduct tests based on all possible combinations of software and hardware environment. Therefore, Penpower is unable to promise nor warrant that there will be absolutely no risk of loss or damage of information, or any other kind of loss, during installation and/or execution of the Software. You must be fully aware of your risks in using the Software.

Penpower will provide you with the Software and support services in respect of the Software to the maximum extent permitted by law. However, Penpower does not warrant that the Software and information included in the package of the Software contain no defects or errors. Penpower is not liable for any indirect, special or incidental loss arising from the Software, including but not limited to loss of profits, damage to business reputation, cessation of work, hardware malfunction or damage, or any other commercial damage or loss arising from commercial use of the Software.

7. Limitation of Liability and Damages

The maximum amount of compensation payable by Penpower, in respect of any damage incurred by you for any reason under this Agreement, is limited to the amount you have already paid to Penpower in respect of the Software.

Under no circumstances will Penpower be held liable for the possibility of loss, notwithstanding Penpower may be aware of the possibility of such loss.

8. Prohibition Against Sublicense

You are prohibited to assign the license in respect of the Software granted to you under this Agreement, or to grant a sublicense to another person.

9. Jurisdiction

With regards to any disputes arising from this Agreement, Penpower and you agree that the court having jurisdiction over the business location of Penpower will be the court in the first instance.

10. Miscellaneous

In the event that any provision of this Agreement is found to be invalid at law, such invalidity will not affect the validity of any other provisions, or the legal enforceability of such other provisions.

In the event that the Software cannot be executed under conditions of normal use, due to any damage to the original disk/s, Penpower will replace the disk/s free of charge.

There may be newer versions of the software that was released during or after this product's manufacturing date. If the content in the User Manual differs from the on-screen interface, please follow the instructions on the on-screen interface instead of the User Manual.

Chapter 1 Product Overview

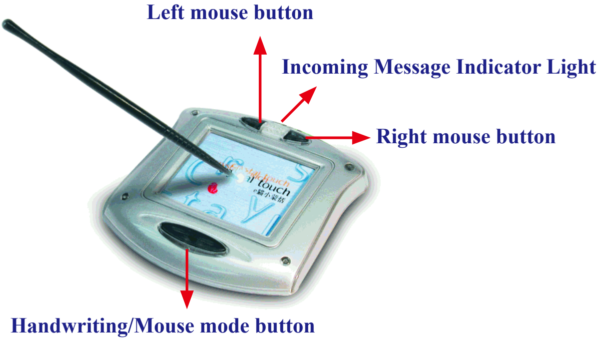
Penpower Junior is available in five models: Penpower Jr. Crystal Touch, Penpower Jr. Steel, Penpower Jr. Diamond, Penpower Jr. miniCard and Carefree Pen. You may choose the model most appropriate to your personal requirements.

1.1 Penpower Jr. Series Overview

1.1.1 Penpower Jr. Crystal Touch

Equipped with a message alert function it flashes and plays music to notify the user that there is an incoming message. The cute design makes it suitable for young MSN users.

Active Pad Area: 2x1.5″

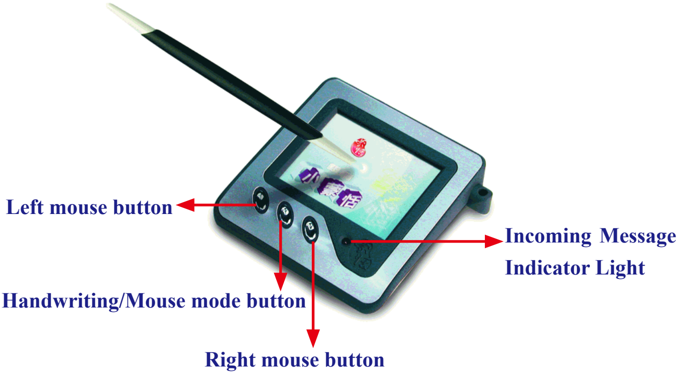


Left mouse button
Incoming Message Indicator Light
Right mouse button
Handwriting/Mouse mode button

1.1.2 Penpower Jr. Steel

This innovative touch pad is not only light and compact but also combines a metallic pad with the texture of leather. Supports incoming message alerts so when an e-mail is received it flashes.

Active Pad Area: 2x1.5”

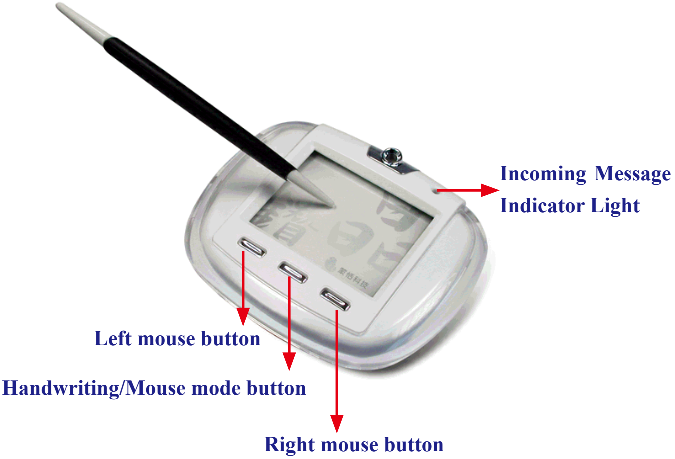


Left mouse button
Incoming Message Indicator Light
Handwriting/Mouse mode button
Right mouse button

1.1.3 Penpower Jr. Diamond

The eye-catching appearance makes this the new choice for the young and trendy. Available in diamond white and diamond black. Supports incoming message alerts so when an e-mail is received it plays music and flashes.

Active Pad Area: 2x1.5”

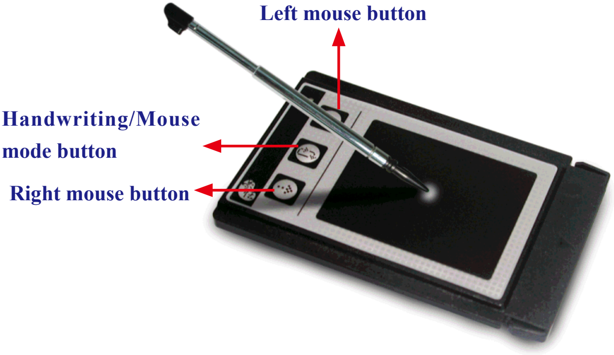


Incoming Message Indicator Light
Left mouse button
Handwriting/Mouse mode button
Right mouse button

1.1.4 Penpower Jr. miniCard

This mini touch pad is designed for use with notebooks. The size of a standard PC card (PCMCIA), it can be stored away in the notebook computer's PCMICA slot when not in use.

Active Pad Area: 1.7x1.3"

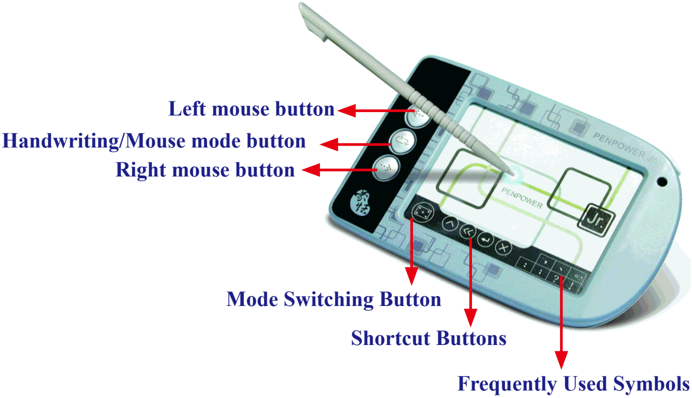


Left mouse button
Handwriting/Mouse mode button
Right mouse button

1.1.5 Penpower Jr. Carefree Pen

The user can change the picture card under the touch pad surface at any time.

Active Pad Area: 3x2"



Left mouse button
Handwriting/Mouse mode button
Right mouse button

Mode Switching Button
Shortcut Buttons
Frequently Used Symbols

Mode Switching Button

Under new handwriting/mouse mode clicking on this button switches between the handwriting and mouse mode; in traditional mode, clicking on this button switches between full-screen and writing pad handwriting modes.

Shortcut Buttons

From left to right, these are used for Insert Space, Delete Previous Character, New Line and Delete Next Character.

1.2 Introduction

Unicode recognition kernel

Support unicode system to input Traditional and Simplified Chinese easily.

All in one recognition kernel of Big5 and GB

The character set can be recognized including more than 23000 Chinese words, 4818 HongKong words, alphabet,numeric, symbol, Hiragana, and Katakana.

Artificial Intelligence recognition kernel

After you correct the recognition result from candidate or AI dialog, the system will modify its recognition database to adapt your personal writing style. This would improve the recognition rate for yourself.

Full screen multi-words free writing

It is allowed to handwrite multiple words before recognition at one time based on the advanced character segmentation technology.

Free writing recognition kernel

Not only the stroke order is free, but even though the careless or illegible continuous free writing could be recognized correctly.

Smart Handwriting/Mouse Mode:

This brand new Penpower mouse is more intuitive and easier to use. Additional symbols and symbol shortcuts are also provided for your convenience.

Other auxiliary function

provide many usefully functions, such as related phrase, related word, special symbol table, homophone,dictionary, learning string, color inking and sound effect...etc, to make input easier.

Word Learning Wizard

All new word learning wizard mode making it easy to set up and manage learning dictionary.

Chinese-English Translation:

Online dictionary with real-time translation between Chinese and English with 139,000 English to Chinese and 76,000 Chinese to English entries.

Penpower VoiceReader

Integrate the Text-to-Speech technology to read aloud the Chinese article content within any window.

Transparent signature

Directly super-impose your signature at the desired area in a Word or Excel document without disrupting the document layout. Or insert your signature into Outlook, Netscape and Eudora e-mails and send it to other people.

Balloon UI

The visual user interface is hidden transparently. The function tool bar will be popped up on the word where the cursor is.

Mail Alert

Auto receive eamil from internet and announce the user by blink or music. (Only supported by Crystal Touch and Steel)

Mail account management

Support account filter and multi-account management. (Only supported by Crystal Touch and Steel)

Inking on MSN Messenger

If you have MSN Messenger 6.1 or above installed, you will be able to transmit handwriting and hand-drawn graphics through MSN Messenger for that extra personal touch.

Fast User Switching

Windows fast user switching supported so every user can have access to their personal settings.

Chapter 2 Installation

2.1 System Requirement

1. Intel Pentium processor or compatible
2. 128MB RAM
3. 150MB disk space
4. Windows 7/Vista/XP OS
5. USB Port

2.2 Handwriting Software Installation

1. Please insert CD-ROM disc into the CD-ROM drive and the system will automatically launch setup.exe. Select the "Install Penpower Jr." option.

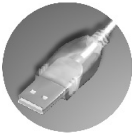
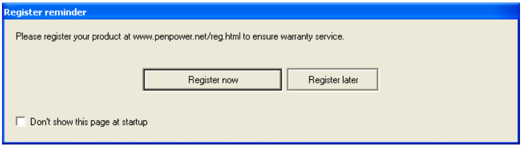
2.3 USB Human Interface Device Installation

Connect the touch-pad with USB port on computer.



2.4 Registration

System will ask you to register for warranty at your first run. Please press **Register now** to start registration or click **Register later** to skip this procedure. You can register later on from [**About]**/[**Register]**. If you want to choose **Register later** and do not need to be reminded again, you can check **Don't show this page at startup**.



Register reminder

Please register your product at www.penpower.net/reg.html to ensure warranty service.

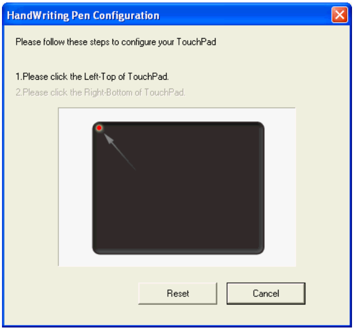
Chapter 3 Hardware Operation

3.1 Calibration

After finishing installation, you should be able to hand write right away. If you found that the inking you wrote is not centered on screen, you need to calibrate your touch-pad to remap the active area.

1. Click Penpower Jr. icon from the top-left corner and select calibration from the menu.
2. Please click on the upper-left corner spot and the lower-right corner spot of touch pad with the pen.

Tip : After calibration, the new configuration would take effect immediately. You do not need reboot or reload Penpower Jr. handwriting system.



Please follow these steps to configure your TouchPad

1.Please click the Left-Top of TouchPad.

2.Please click the Right-Bottom of TouchPad.

Note: When calibrating the Penpower miniCard please orient the touch pad so it's in landscape mode.

3.2 Touch-Pad Operation

1. Moving: Put the pen on the touch-pad, and then move it on the panel gently.
2. Click: Hit the touch-pad once.

3. Dragging: Hit the touch-pad twice quickly, and move the pen on the panel while second pen down.

4. Double click: it the touch-pad twice quickly.

5. There are three buttons on the touch-pad as normal mouse functionality, but the middle button is defined to toggle pen mode and mouse mode. The left button would be revised for error correction on pen mode state. While you press the left button once each time, the latest recognized result would be replaced with the next candidate word. It lets you correct the result quickly without switching to mouse mode.

Tip : The three buttons are not on a line for some touch-pad. The alone one is the middle button.

Tip : You can click the mode button on the window to switch mouse mode and pen mode.

Chapter 4 New Handwriting/Mouse Mode

4.1 Run Penpower Jr. Handwriting System

If you installed “New Handwriting/Mouse Mode“ and run “Start/All Programs/PenpowerJr/Penpower Jr.”, you will see the New Handwriting window as following:

4.2 Switching Modes

Penpower Jr. has the Handwriting and Mouse modes. The Handwriting mode provides writing and recognition functions. You can select the candidates, related words, phrases and symbols via mouse.

In Mouse mode, you can use the writing pad and pen as the mouse to select the candidates, related words, phrases and symbols. It also provides handwriting inking review, and some function buttons such as AI, learning tool, phrase, signature and on-line translator.

When Penpower Junior is launched for the first time it will start in the handwriting mode. Left mouse click on the "Menu" button or right mouse click on the toolbar to open the options menu. Select "Penpower mouse mode" to switch to the mouse mode.

In mouse mode, click on the "Switch" button to switch back to the handwriting mode.

Tip: The middle function button on the Penpower Junior touch pad allows fast switching between the handwriting and mouse modes.

4.3.2 Full Screen Handwriting Mode

There are three different options of full screen mode in the main menu.

Single-word writing

It is allowed to handwrite one word only at one time.You can not handwrite the next word until the recognition result of current word has been finished.

Two-sides writing

After the first stroke is written, one vertical line would be displayed on the center of screen. All the strokes written on the same side would be considered as part of one word. When a new stroke is crossed to the other side, it means that the last word is finished and the next word start to write.

Free writing

You can handwrite multiple characters before recognition at one time. Forty one characters at most is allowed. It permits left-to-right,or top-to-bottom free writing order. Remember to keep adequate distance between two contiguous words when you write. It affects the result of character segmentation.

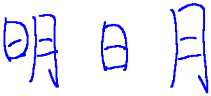
4.3.3 How to Write

On Free writing mode, it's better to keep strokes of the same word closed, and keep not to overlap between words when you write. You need to finish writing every strokes of one word.

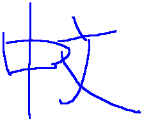
Right example

Write three words of 『明日月』.



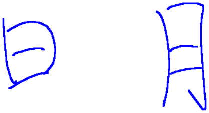
Wrong example 1

Overlap between two words. All the strokes may be recognized as one word.



Wrong example 2

The two parts of one word are written far away from each other. All the strokes may be segmented into two words.



Auto Phrase Correction

The system automatically proofreads on your writing content to improve the recognition rate. For example, when you continuously write『天下太平』(peace on the earth) four characters, but the character『天』is incorrectly written as『夫』, so they become『夫下太平』. Penpower uses its internal phrase dictionary to correctly recognize your intended result『天下太平』.

4.3.4 How to quickly fix errors, enter phrases and symbols

When writing, candidate words based on the previous input will be displayed on the handwriting toolbar. Each press of the left function button on the touch pad will move the candidate words forward by one and also correct the results, allowing errors to be quickly fixed; the right function button allows the input of six habitual symbols. Alternatively, select a candidate word on the handwriting toolbar to correct it. Press the symbols table button with the mouse to open the symbols table and enter the corresponding punctuation symbol.

You can also press the middle function button on the touch pad to switch to the mouse mode. In mouse mode, select the candidate word for the candidate words, post-related word, phrase or select symbol input.

For example: In handwriting mode, the input『蒙恬科技』had the character『技』misread as『投』. Here you can press the middle function button on the touch pad to switch to the mouse mode then choose from the candidate words field『技』to correct the mistake. Once fixed, press the middle function button to switch back to the handwriting mode and continue writing.

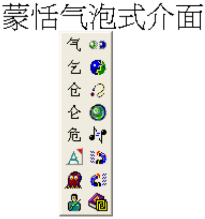
∫ ∮ ∴ ∵ ≒ ≠ ≡

4.4 Balloon UI



This unique user interface let you edit recognition result freely in any application. The visual user interface is hidden transparently. When you want to correct some word, just move the cursor position on this word for a while. The function tool bar will be popped up there where the cursor is.

Tip : You do not need to press any button after the cursor is moved on the word.

In the function tool bar, click candidate words, AI button , homophone , pre-related word , post-related word or phrase correction to correct the result. click button to see the raw inking. Click button to see the tutor. Click button to input punctuation symbol. Click button to split one word. Click button to merge the word with next word. The button is for the Chinese-English translation function. Details are provided further on.

Note: In New Handwriting/Mouse mode the balloon interface functions can only be operated with the computer mouse.

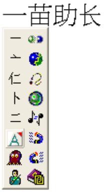
Note: Balloon Interface can be used in Office, IE, WordPad, but on 64 bit systerm, it can not be used in some software, ext. note.

4.4.1 Phrase Correction

In Full Screen mode if you wish to enter a common phrase such as an idiom, if you aren't sure of how to write one of the characters you can substitute a similar sounding character instead. If you are not sure of the character's pronunciation either, choose any at random. When you have finished writing the phrase, select the uncertain character with the mouse then click on the phrase correction button. The system will examine the four characters before or after this particular character to guess what you meant and make the change.

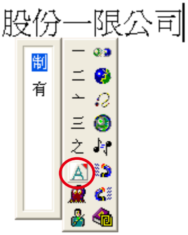
1. When entering an idiom in Full Screen mode such as『拔苗助长』, if you are not sure of how to write the character『拔』, you can enter the character『一』instead to input『一苗助长』.
2. Move the mouse over the character『一』and pause for a moment to bring up the "Candidate Characters Window". Click the phrase correction button and the『一』character will be changed to『拔』.

一苗助长



拔苗助长

3. If the phrase correction function came up with multiple candidate words, these will be shown in the candidate words window for you to choose from. For example, if the input was『股份一限公司』when you pause the mouse cursor over the『一』character, this will bring up the “Candidate Characters Window”. Pressing the phrase correction button will bring up a list of all phrase correction candidate words for you to choose and make the correction with.



股份一限公司

4.4.2 Artificial Intelligence

When you use candidate word or AI button to correct result, the system will modify its recognition database to adapt your personal writing style. The may improve the recognition rate.

1. Handwrite some words. The result would be sent in the caret.

2. e.g.『恬』is wrongly recognized as『恰』.

蒙恰科技

3. Move the cursor on the word『恰』for a while to pop up the function tool bar.

4. Click the candidate word if the correct word is there.

5. Otherwise click the AI button to open the AI correction dialog.
6. Input the correct word『恬』, and then click “OK”.
7. You will see the wrong result『恰』is already updated as『恬』. Your personal writing style of inking has also been learned.

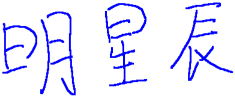
∫ ∮ ∴ ∵ ≒ ≠ ≡

4.4.3 Split

When two words are written too close, they may be recognized as single word. You can use split function to separate it into two words.

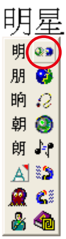
1. Handwrite four words『日月星辰』by free writing. The result would be sent in the caret.



2. If『日』and『月』is written too close, you may wrongly get three words of result『明星辰』.

明星辰

3. Move the cursor on the word 『明』for a while to pop up the function tool bar.



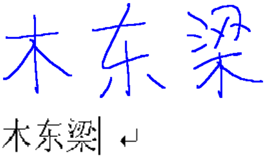
明星辰

4. Click button to separate 『明』into『日』and『月』.

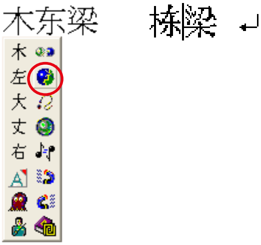
日月星辰

4.4.4 Merge

When some strokes of one word are written far away from each other, they may be recognized as several words. You can use merge function to combined them into one word.



1. Handwrite two words『栋梁』by free writing. The result would be sent in the caret.
2. If『木』and『东』is written far away from each other, you may wrongly get three words of result『木东梁』.
3. Move the cursor on the first word『木』for a while to pop up the function tool bar.
4. Click button to merge『木』and『东』into『栋』.



Note : Only two continuous words could be merged at one time.

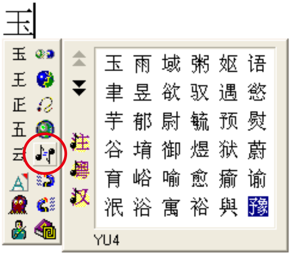
4.4.5 Homophone

If you forget how to write some words, or they are too complicated to write, you can write down some other easy homophone to get the word that you would like to input. e.g. If you want to input the word『豫』:

1. Write any one homophone of『豫』, e.g.『玉』. The result would be sent in the caret.

2. Move the cursor on the first word『玉』for a while to pop up the function tool bar.

3. Click ♫ button to open the window of homophone words.



玉	雨	域	粥	妪	语
聿	昱	欲	驭	遇	慾
芋	郁	尉	毓	预	熨
谷	堉	御	煜	狱	蔚
育	峪	喻	愈	瘉	谕
浤	浴	寓	裕	與	豫

4. You can Click 注 / 粵 / 汉 button to toggle other Zhu yin homophone/ Cantonese homophone/Hanyu homophone.

5. Click『豫』to replace『玉』.

豫

4.4.6 Related word

For any two contiguous words, the first one is the pre-related word of the second one. The second one is the post-related word of the first one.

e.g.『科技』,『科』is the pre-related word of『技』, and『技』is the post-related word of『科』.

1. Handwrite some words. The result would be sent in the caret e.g.『恬』is wrongly recognized as『恰』, and『科』is wrongly recognized as『料』.

2. Move the cursor on the word『恰』for a while to pop up the function tool bar.

蒙恰料技

3. Click button to open the window of pre-related phrases. If the correct phrase『蒙恬』is in the list, click it to update the result.

4.5 New Mouse Mode

The following will introduce the function buttons of Mouse mode, such as Artificial Intelligence, learning tool, phrase, signature, on-line translator and settings.

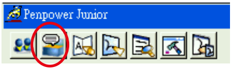
4.5.1 Artificial Intelligence

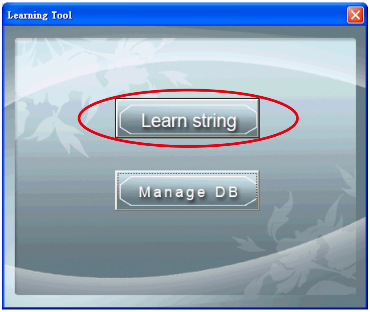
When writing a word in the New Handwriting mode, you can push the middle button for switching to the Mouse mode. You can click [Artificial Intelligence function] 👥 to adapt your personal writing style. Please refer to 4.4.2 for details.

4.5.2 Learning String

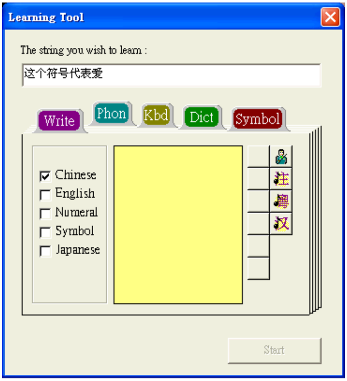
A string is represented by an inking of symbol. So, you can handwrite the symbol anytime and the recognition engine will recognize it as the expanded string. It prevents you from redundant writing.

1. In Mouse mode, press the "Learning Tool" button to open the Learning Too Window. Select "Learn String" to open the "Learning Tool" screen.





2. Input the string you want to learn, then click on "Start".



Learning Tool

Q W E R T Y U I O P
A S D F G H J K L
Z X C V B N M
Clear
Back
OK
Cancel

Input: 一不做二不休

Chinese phonetics:
一 : Yi1
不 : Bu4
做 : Zuo4
二 : Er4
不 : Bu4
休 : Xiu1

Catonese phonetics:
一 : Jat1
不 : Bat1
做 : Zou6
二 : Ji6
不 : Bat1
休 : Jau1

You need to update the phonetics on the right side. Click / button to hear their pronunciation and check if the one you choose is right.

Note : The maximum length of one phrase is 200 word. In fact, the phonetics is only for VoiceReader to read text with right sound of phonetics. If you do not care, you can skip it.

Click "OK" to finish insertion. Afterward, if you write『一』, then『一不做二不休』would be displayed in the related phrase window. Just click it to input.

3. Selet on phrase from the list, and then click “Modify” to update the phonetics of this phrase. Click “Delete” to delete this phrase from database.
4. In “Search string” field, you can only input part of a phrase to find this phrase quickly.
5. You can use “New”, “Open”, “Save”, “Save As” function to manage your phrase database (*.yib).

Note: Although you can create several phrase database, you can only choose one at one time.

6. Import file

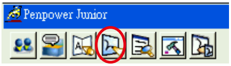
Click “Import” and select one phrase database(*.yib) or text file to import it into current database.

The text file format must follow this rule - one phrase in each line. You can edit it by any editor, e.g. NotePad.

Note: Every imported phrase would own phonetecs by default. Their phonetics may be wrong. You can modify them from phrase dialog.

4.5.4 Signature

1. Move the caret to where the signature will be.
2. Open the Mouse mode and press the "Signature" button. The "Welcome to Penpower Signature Tool" screen will be shown and you are now in the signature mode.



3. In signature mode, the right button is defined to toggle pen mode and mouse mode. You must switch to pen mode before start to sign your signature. The left button is defined to change color.

🟥🟪🟦🟩🟨 ▾ : Change the color of inking.
— ▾ : Change the thickness of inking.
🖌 ▾ : There three kind of pen style to change.
🗋 : Clear all.
↶ : Undo one stroke.
↷ : redo one stroke.

4. Click ✗ button to cancel signature.

5. Click ✓ button to insert your signature in the caret.

4.7.1 Recognition Setting

Mode

The recognition mode of Chinese, English, Numeral, Symbol and Japanese could be turned on/off individually. You could turn on several modes at the same time.

Recognition

1. Simplified character:All the results are simplified words. If you do not know how to write traditional words, you can turn off "Traditional to Simplified" option to disable the traditional writing.

Note: "Traditional to Simplified" option is available only when you switch to the simplified version.

2. Traditional character:All the results are traditional words.
3. Traditional+Simplified:You will get traditional words while using traditional writing, and get simplified words while using simplified writing.

Unusual character

The system will recognize some unusual words only when you turn on “Unusual character” option.

Running Hand

Check this option to have the software recognize run-on cursive.

Hongkong Character

This recognition mode is only available when the Penpower Jr. is set to the Traditional Chinese or Traditional Chinese (Hongkong) version. You can connect to http://www.microsoft.com/hk/hkscs/default.aspx to check the Hongkong characters list.

5.6.2 Signature

Move the caret to where the signature will be. Then select “Signature” from the main menu to open the “Welcom to Penpower Signature Tool” screen, and enter in signature mode.

Please refer to Chapter 4.4.4 for more details.

5.6.3 On-Line Translator

Select “On-Line Translat” from the main menu to open the On-Line Translat function. Select again to close the function.

Please refer to Chapter 4.5.5 for more details.

5.6.4 Setting

In Penpower Junior’s options menu select “Settings” to open the settings page. You can configure the recognition engine, output format or writing tracks here. For more details on PenPower settings please refer to the explanation provided in Chapter 4.7. The only difference is that in Traditional mode the writing pad display can be configured here.

Please switch to the “General” setting page and in the “Display” area you can choose whether to display the window title and the buffer area.

Title bar

Show/hide the caption of writing-pad.

Buffer

Show/hide the text buffer of Writing-pad. If the buffer is displayed, all the recognition result would be put here. After the buffer is full, the first word would be popped out into the caret. You can also click ⬆ button to force all the result popped out and clear the buffer anytime. If the buffer is hidden, the recognition result will be send to the caret directly.

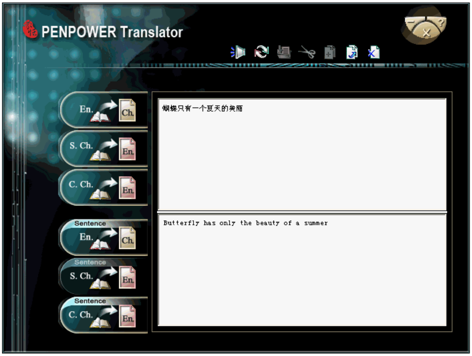
6.2.4 Chinese English Article Translator

1. Click the button "Sentence S. Ch.En." translation on the left.
2. In the top input frame, input an Chinese article, click the 🔄 button to start translation. The translation result is shown in the lower input frame.

Tip: If the Chinese sentence you wish to look up is Traditional Chinese, please select the " Sentence C. Ch. En." translation option.



蝴蝶只有一个夏天的美丽

Butterfly has only the beauty of a summer

Press the Speech 🔊 button. If looking up a single character or word, the system will provide its Chinese or English pronunciation. If translating the entire text, it will read all of the content in the current input window.

The other buttons on the translator interface have the following functions:

◀/▶ : Previous/Next: look up the definitions for nearby words.

✂: Cut: cut the selected content. (Only available when translating an entire sentence)

📋: Copy: copy the selected content.

: Paste: paste the cut or copied content. (Only available when translating an entire sentence)

: Delete: delete all input and translation content. (Only available when translating an entire sentence)

: Save: press this button to open the “Save as…” dialogue window. This will save all of the input and translated content into a new *.txt format file. (Only available when translating an entire sentence.)

When looking up a single word you do not need to enter the entire text string. If the word you wish to look up shows up in the list, use the direction keys to select that word as the input then press Enter to look up that word.
